Project Information

Prepared by: Chintala Anitha

Tool Used: Power BI

1. Project Overview

This dashboard analyzes employee productivity and workplace laziness using the Laziness Index. It helps HR identify productivity trends and departments that require intervention.

2. Dashboard Features

KPI Cards-

- Total Employees
- Average Laziness Index
- Average Completion
- High Laziness Employees

Visuals-

- Laziness Index by Department
- Work Mode vs Productivity Category
- Productivity Distribution
- Login Hours vs Tasks Completed
- Top 10 Most Lazy Employees
- Drillthrough Page
- Decomposition Tree
- What-if Parameter

Slicers-

- Department
 - Salary Level
 - Work Mode
-

3. Employee Details Page

The drillthrough page provides employee-level information such as:

- Employee ID
- Department
- Work Mode

- Laziness Index
 - Performance Rating
 - Salary Level
 - Meetings Attended
 - Deadline Missed
-

4. Analytical Questions & Answers

Q1. Which department has the highest average laziness?

IT department has the highest average Laziness Index.

Q2. Is WFH more associated with laziness?

Yes. WFH employees show slightly higher laziness than Work from office employees.

Q3. Does salary level impact productivity?

Salary level has only a minor impact. Work mode and employee behavior influence productivity more.

Q4. What is the relationship between social media usage and missed deadlines?

Higher social media usage is associated with more missed deadlines.

Q5. Who are the top 5 most productive employees?

Top 5 - EMP122, EMP163, EMP024, EMP019 & EMP049

Q6. Is meeting attendance affecting task completion?

Meeting attendance shows a limited impact on task completion.

Q7. Which department needs HR intervention?

IT department requires HR intervention due to the highest average Laziness Index.

5. Conclusion

The dashboard provides insights into employee productivity, identifies high-laziness patterns, and helps HR make data-driven decisions. Features like Drillthrough, Decomposition Tree, and What-if Parameter improve interactive analysis.
